

SECRET

LOGNOTE -- Chief, Operations Group, 29 November 1983

2. Following from this morning's staff meeting:

25X1

- Amb. Hayes Isham, Chief of the HUMINT Group of the IC Staff, and his deputy, Capt. Heizinger, will visit FBIS probably next week for a short briefing and visit with the groups. Isham was in Hong Kong during the Vietnam War and knows FBIS well.
- Two NSA officers visited yesterday and offered NSA help with computer information on satellite frequencies. They will be forwarding a printout of some kind. They would like two FBIS people to visit Ft. Meade for two-three days to look through the stuff they have on file. They noted the great difficulty of cruising and keeping track of what is carried on satellites.
- The FOIA law has been revised. DD/S&T has a special exemption which prevents "operational files" being searched. We decided most FBIS files are operational.
- Harry Fitzwater is meeting with Congress this week to sort out the final details on leasing of
- Bob Gates is chairing a working group on improving collection of economic intelligence.
- Security is still looking into improving security for Key Building; no one has much hope for anything very positive resulting.
